

# STEM beyond the Classroom

National Museum Cardiff

Saturday 11 November 2017

10am - 2.30 pm Doors open 9.45am for registration

Inspirational lectures and workshops for Primary & Secondary teachers that aim to address the new science and technology curriculum.

## Keynote Talks

**Prof Justin Dillon**, Professor of Science and Environmental Education, University of Bristol, explores some of the issues around learning outside the classroom.

**Dr Rhys Jones**, lecturer, herpetologist and presenter of 'Rhys to the Rescue', presents on his own experiences of science communication and the need for literacy in science.

## Workshops and presentations

Primary and Secondary science workshops will cover a range of topics from animal behaviour and scientific research, to chemistry and astronomy.

A series of short teacher-led vignettes will explore approaches to inspiring science opportunities.

There will also be a special Presentation of Awards for the Primary Science Quality Mark.

To book a **FREE** place and your workshop choices go to:
