

Dracoraptor

Dinosaur Evidence KS2

What evidence can we find for how the Welsh dinosaur lived?

Have a look at the display and then try to answer these questions. You can find more evidence in the Evolution of Wales gallery.

1. When did this dinosaur live? _____

2. How tall was the dinosaur? Was it an adult or a child? _____

3. Was the dinosaur a carnivore or a herbivore? How could you tell?

4. Did it live on land or in the sea? _____

5. Were its' bones found with fossils of land animals or sea creatures?

6. Draw one of the fossils found with Dracoraptor here:

Fossil name: _____

7. What happened to the dinosaur after it died? _____

8. Who found its' bones? What did they do with them?

9. Do you think the Welsh dinosaur was fast or slow? _____

10. What type of fossils could help scientists find out? _____

11. What evidence do we have of other animals that lived at the same time?

We can use this evidence to build up a picture of Dracoraptor's world.

What do you think the dinosaur's world looked like? Draw a picture.
