

# Make your own origami booklet!

## The Hidden Life of a Bulb by Professor Plant.

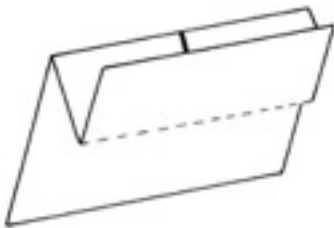

Learn about the life cycle of a bulb by creating your own origami booklet.

How to make your booklet:

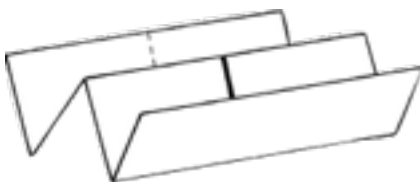

1. Fold the paper down the middle like this, then cut the paper along the thick black line shown below. The cut should be from the centre and run half-way through both sides of the piece of paper.

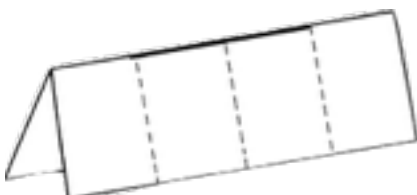

2. Fold the paper along the dotted lines on both sides, like this.

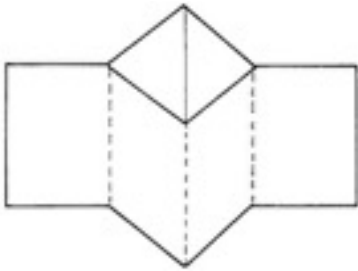

3. Your paper should now look like this.

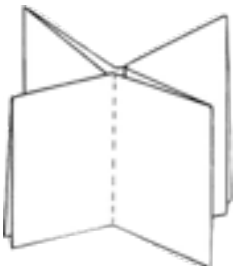

4. Open the paper back up, and fold it in half in the other direction.

6. Push the two ends together into a shape like this, and then keep pushing until the paper forms a cross shape.

7. Now crease the paper into a booklet, making sure that the cover is at the front.

Well done Bulb Buddies!
