

Upcycled Wreath

Create your own recycled wreath, using scraps of unwanted fabric or household materials

You will need:

- A paper plate or piece of cardboard cut into a similar shape
- Strips of unwanted fabric
- A piece of ribbon or twine

Upcycled Wreath

Instructions

1. Cut a large hole in the centre of your plate or card. This will be the frame for your wreath.
2. Tie strips of fabric around the frame, simply tying it into a knot. No glue needed!
3. Continue the ties, until the whole frame has been covered.
4. Knot a piece of ribbon or twine around the wreath. It is now ready to hang!

TIP: Instead of fabric, you could recycle other unwanted material such as bubble wrap or Christmas wrapping paper.

See what you can find!
