

7

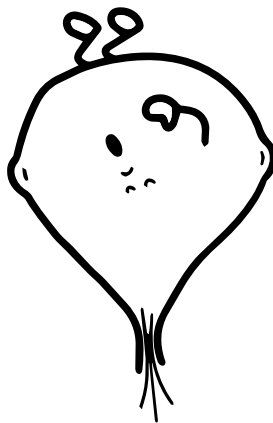

The new leaves make food
and the flowers make seeds

6

When a bulb thinks it is
warm enough, it starts to
grow roots and buds.
The bulb uses its stored
food to grow into a plant
with leaves and flowers

What do bulbs do
in the Spring?

5

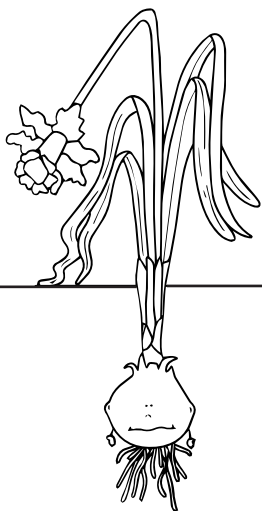

They sleep underground
during the cold winter months
- waiting for some warmth...

Autumn and Winter?

What do bulbs do in the

4

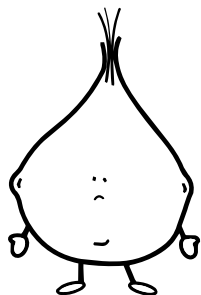

At the end of Spring the
plant dies back and stores all
its food for next Autumn

The Secret Undercover Life of a Bulb

By Professor Plant

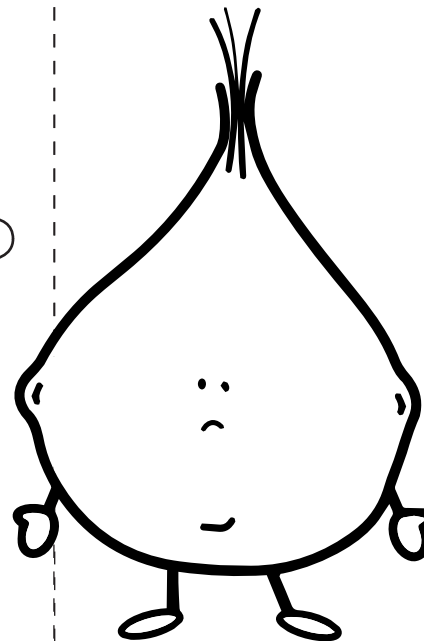

1

Why are bulbs

ROUND?

Bulbs are round
because they are full
of food and water!
