

The new leaves make food and the flowers make seeds

At the end of Spring the plant dies back and stores all its food for next Autumn

What do bulbs do in the Spring?
When a bulb thinks it is warm enough, it starts to grow roots and buds.
The bulb uses its stored food to grow into a plant with leaves and flowers

AMGUEDDFA CYMRU
The Secret Undercover Life of a Bulb
By Professor Plant

Why are bulbs **ROUND?**
Bulbs are round because they are full of food and water!

What do bulbs do in the Autumn and Winter?
They sleep underground during the cold winter months - waiting for some warmth...
