

Toys Workshop

We look forward to seeing you at our Virtual Toys session soon. To help your pupils get the most out of the session, here are some ideas for discussion and activities to do beforehand:

Curate a classroom museum display:

Draw a picture of the toy you love to play with the most. Label any important features, or write a sentence describing your toy. (Can bring real toys in when schools allow objects to be brought in from home).

Discuss...

Have a class/group discussion about your favourite toys. Think about size, shape, colour and material.

Compare and contrast:

Are all the toys the same, or are some different? Could you make a bar chart to show the number of different toys?

After your visit...

Why not try making some traditional toys to play with? A variety of instructions can be found here:
